Bidders must demonstrate experiences in designing and maintaining body worn camera and backend server solutions. The intent of this request for proposal is to find the body worn video camera for public safety use that offers ease of use, functionality, recording and storage capabilities. Proposers shall only submit one proposal per firm.

2. BACKGROUND

The City requests proposals to implement 50 body worn video/audio (video) cameras to be worn by the patrol division and/or selected other areas. These body worn video cameras will be worn outside of the officer’s uniform. The City of Phoenix intends to have these units worn full time by the patrol division and/or selected other areas. The video system must support a backend internet protocol (IP), externally hosted, based retrieval system available to multiple users.

The need for a body worn video camera system arose out of the Community Engagement and Outreach Task Force, implemented by the City Manager in 2010. After numerous task force meetings, one of the thirty-four recommendations was that police officers in the patrol division utilized an on-person or in-car video camera system.

In 2011, a pilot project was spearheaded with a local law enforcement product company which provided 18 units to the Department along with a backend server solution. Though this pilot project lasted four months, the Department clearly saw the use to procure a similar system.

Following the pilot project, the Department applied for and was awarded a grant from the U.S. Department of Justice, Bureau of Justice Assistance, under the Smart Policing Initiative to procure, study, and report on the results of instituting a body worn video camera system.
